I have 6 years of experience in software development and integration. As a Mechatronics Engineer and Industrial Programmer, I have worked on data integration projects and the design of control interfaces for industrial systems. Currently transitioning into frontend web development, I bring hands-on experience with React, API data integration, and implementing updates for web platforms. I have collaborated closely with UI/UX design teams, QA testing teams, and backend developers to deliver efficient, scalable, and user-friendly solutions.

EXPERIENCE

FREELANCER | FRONT DEVELOPER

2023-2024

- I worked as a freelance developer for a national e-commerce platform, providing maintenance support, implementing updates, and developing new application logic. In this role, I utilized technologies such as React, GraphQL, Zustand, and Emotion Styled to deliver scalable and efficient solutions. I collaborated closely with cross-functional teams, including design, QA testing, and backend development, ensuring seamless integration and high-quality results across the application.

TASAMI SAC | PROJECT MANAGER

2018-2022

- Creation and deployment of a web installation and supervision system for industrial companies in the security area, for their fire protection systems, using technologies such as raspberry PI, MySQL and PHP. Then migrate that development to Windows server with SQL server and C#, html & CSS.
- I learned and applied skills in web development, leading a work team, working under pressure, delivery of project documentation and staff training.

EDUCATION

UDEMY | Full-Stack Web Developer course. HTML, CSS, JavaScript, Node, MongoDB - Bootcamp

2022 Oct-Nov

- 60 hours of classes, more than 100 hours of coding time and developing more than 10 web applications.

I learned and use technologies, including:

- Bootstrap, jQuery, DOM manipulation, Bash command line, Git & GitHub, Backend Web development, Node.js, NPM, APIs Databases, SQL, Web Design & also deployment the projects with GitHub Pages, Heroku and Netlify

UDEMY | React Developer

2023 Jan-Nov. 2022

- 40 hours of classes, more than 70 hours of coding time and developing more than 15 web applications using functional components, good practices, hooks and custom hooks.

I learned about React deeply, HOC (High order components), context API, Redux, Router, Bootstrap in React

PLATZI | BASIC PROGRAMMING COURSE

2022 Oct.

- Learned an applied full stack development basic skill in JavaScript, node JS, Express, HTML & CSS
- 88 classes, and 50 hours of coding time.

- C++ programming with Arduino
- Python, MySQL and PHP programming with raspberry pi
- Ladder programming for electronic devices

LANGUAGES

- Spanish – Native
- English - Advance
